

## PRESS RELEASE

March 21<sup>st</sup>, 2018

### **VMI at Tires & Rubber show in Moscow**

The teams of VMI Tire and VMI Rubber will join our Russian team again at the Tires & Rubber show in Moscow, Russia.

The Tires & Rubber show focusses on rubber goods, tires, raw materials and equipment and is an excellent place to meet with customers and interested parties. The latest trends and experiences on the Russian rubber- and tire industry are discussed, which gives us a good update on the wishes and needs of our market, especially in Russia.

VMI Tire will showcase the VMI EDGIQ steel belt cutter, which is a cutting and splicing system producing high quality steel belt and chafer material for radial passenger tires. The system has an unprecedented daily production output, while at the same time gives full flexibility in the production process. With only one operator, a daily production of 70 km first class quality steel belt can be achieved. Incorporating VMI's MAXX technology, the EDGIQ, in its most automated configuration, is optimally suited for hands-off, eyes-off production.

You are very welcome to visit the VMI Group at Tires & Rubber to discuss details of VMI Tire and Rubber solutions to see if they meet your requirements. You can find VMI Group in the Forum hall at stand number FE128.

*Tires & Rubber is organized in Moscow, Russia on the 24 – 27th of April 2018.*
